WMF Gourmet Moments

Coffee or tea?  
Just pour it out  
and *enjoy the*  
harmony.

Coffee or tea? – It is not a question of principles – preferably both. Depending on the time and the occasion, fruit tea sometimes goes down better than coffee, while you may want a warm drink in cold weather. The design delivers the key to stylish indulgence. The pots in the **WMF CoffeeTime** and **WMF TeaTime** collections have matching designs.

Milk and sugar accessories combine easily with everything. They fit together to give your table an overall harmonious appearance. All the products can also be used individually. The straight line design and trendy combination of materials are suitable for any setting.

See page 6 | 12

Brew up, pour some for  
**everyone!** And *treat*  
yourself *to a moment*  
of pure indulgence.

Coffee is a much-loved drink all over the world, and every coffee lover swears by their own special way of making it. You'll be sure of finding the right jug for your French Press or hand filter at WMF. Matching cups, glasses and accessories are also available to ensure you can enjoy your coffee or tea in style. The clear, no-frills design ensures that everything works in harmony.

# WMF CoffeeTime

WMF CoffeeTime has the right jug for everybody to enjoy their favourite type of coffee. Fans of the French method will like the French Coffee Press with its sturdy plunger made of Cromargan®. Things are nice and easy with the Light Brew. The strainer with coffee grounds is completely removed. Those who like their coffee mild and fruity go for the Cold Brew. The coffee is covered with cold water and left to brew overnight. Pour Over is a traditional option that uses a permanent filter with a honeycomb structure. Some things are the same for all models though: sophisticated functionality and proven quality materials and workmanship. Matching cups, glasses and accessories are also available for each design.

# Barista

The Barista range has a cup for every type of coffee, enabling it to develop its individual taste to its full potential. Three factors here are key: the dimensions (cup height and diameter), thickness and shape. Milk and sugar accessories are available in a matching design.

*Pour it on,  
let it brew!  
And then just  
let it out.*

Tea or coffee – it doesn't have to be one or the other any more. Since the design and materials of the jugs and accessories coordinate with each other so well, coffee and tea drinkers go well together at the table. And also when a nice cool drink is in order instead of something to warm you up, everything from the WMF CoffeeTime and WMF TeaTime collections goes well together.

## Recipe for iced tea

Prepare a litre of black tea and sweeten to taste.

Add the juice of one lemon and leave to cool down to room temperature. Pour the black tea through the Turbo Cooler before serving. Refine the taste with lemon slices and mint leaves and enjoy as an ice-cold, refreshing beverage.

# WMF IceTeaTime

Iced tea is a great thirst-quencher in summer and tastes best when it is home made. If you ever forget to chill it in time, the Turbo Cooler can help. It chills iced tea and all non-carbonated drinks in just a few seconds from room temperature to refrigerator temperature.

**IceTeaTime Turbo Cooler**  
With adapter for decanter. NAS/PP synthetic material,

06 3637 6040

A hand is pouring water from a clear glass carafe with a silver-colored rim into a tall, clear glass. The carafe contains ice cubes and green herbs. The background shows a wooden table with a plate of food, a bowl of green olives, and a bowl of nuts. The text "Let it fizz, be refreshed! Quench your thirst, not your enthusiasm." is overlaid on the left side of the image.

Let it fizz,  
be refreshed! *Quench*  
your thirst, not your  
enthusiasm.

Not only does water quench your thirst, it thrills you. A beautiful decanter filled with fresh water on the table is also a clear and refreshing sight for your eyes.
